# RIVER BASIN MANAGEMENT PLANS INFORMATION AND PARTICIPATION

Venice, 13th September 2010  
**Gallmetzer - Horak**

# WATER

- People are water connected and are attracted by it, they've always been on the side of a river. Cities, bridges, economy are all witnesses of this close relationship. But nowadays we have to protect these very fragile areas, so that they can still be inhabited.

Water

“You cannot be defined.  
You are savored, but you remain unknown.  
You are not a necessity of life:  
You are life!”

(Antoine de Saint-Exupéry)

# Change of land use

1910

2010

# Stakeholders

# River basin management

How can we avoid this?

Why do we need a management plan?

# Increased damage potential

Increased need of protection

Increased economy along the rivers

What can we do?

# River basin management plan

Sustainable development of the river basin considering the demand of:

- Flood protection
- Development of housing
- Industry
- Water economy
- Ecology
- Tourism
- Agriculture

More space for people, that means  
more security, more ecology and more  
room for leisure.

# River basin management plan

- Increased request of protection in the population
- Increased damage potential with flood consequences
  - Agreement between the demands
  - Align the plans, interaction between the river basin stakeholders

Information and participation

Venice, 13.09.2010

# Project organisation

# Project structure

# Water hazards module

## 1. Discharge

Hydrological-hydraulic situation, flood discharge rooms, variations analysis for hydraulic solutions.

## 2. Bed load

Total bed load volume, bed load budget, debris flow.-

# Land module

## 1. Rights:

Public water asset,...  
water rights, other legal  
regulations, environment  
and landscape protection,  
groundwater, fishery.

## 2. Space planning:

Economy actions and added  
value, construction management  
plans, landscape management  
plans, protected areas plans,  
tourism and recreation,  
infrastructures.

## 3. Land use:

Landscape inventory,  
(vegetation structures,  
waters, land use, historical  
land use maps).

# Tourism and leisure

Information and participation

Venice, 13.09.2010

# Water economy module

# Ecology module

## 1. Terrestrial ecology

Actual and historical features, description and mapping of animals and plants groups (birds, amphibian,...), hazards areas.

## 2. Water ecology

Survey of the spineless fish fauna, water structures, water assets, friendly to fish passage, flood caused by energy company, change effect of the river shape and water ecology.

# Networking

## Risks areas

Intersections between hazards and damage potentials on thematic maps.

## Conflict areas

Networked thematic maps, links, shortage, potentials,... as a results of the 4 modules.

# Model

**“Has to be” condition** to define a river basin area on the analysis and networking as for legal frame conditions (EU-WRRL,...), workshops, River basin - Forum, collective consensus of the realisable plan of actions.

## Plan for transfer:

River basin-Forum, workshops, collective consensus, actions catalog list of priorities.

# Model

# Action proposals

# Information – School workshop

## Primary school Prato allo Stelvio:

*"With enthusiasm we participate as students and teachers to the project "River-Bus". The guide and organisation was very well prepared. Compliments to Regina and Othmar's ability in succeeding to teach some important issues to children. Our students could look at Prader Sand with different eyes. Also, the parents were very positively impressed...."*

# Information - Exhibition

Moving exhibition (from Lasa, 03.06. to Curon 15.09.)

# Leaflets and posters

The collage includes several documents and images:

- Left side:**
  - A banner for "01}04}09 ore 20 Uhr } Acquaprad" featuring the ETSCH DIALOG logo.
  - A document titled "Mehr für unseren Fluss..." (More for our river...) with text about river basin management and participation.
  - A document titled "Un valore aggiunto per il nostro fiume..." (A value added for our river...) with text about the project and speakers.
  - A small image of a dragonfly on a leaf.
  - A small image of two people in a field.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
- Middle section:**
  - A large blue triangular graphic containing text about water management and participation.
  - A photograph of a flowering tree branch.
  - A photograph of two people looking at a map or document.
  - A photograph of a landscape with a bridge.
  - A photograph of a landscape with a bridge.
  - A photograph of a landscape with a bridge.
  - A photograph of a landscape with a bridge.
  - A photograph of a landscape with a bridge.
- Right side:**
  - A banner for "19}09}09" with text about the opening of the Wildbachverbauung.
  - A document titled "Festa del Fiume" (River Festival) with details about the event.
  - A small image of a dragonfly on a leaf.
  - A small image of two people in a field.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
  - A small image of a landscape with a bridge.
