## THE VENUE

The Fucino 2015 workshop will be held at Centro Studi Ignazio Silone at Pescara, a cultural center dedicated to the memory of Ignazio Silone, an Italian world-famous writer born in Pescara who lost most of the family in the 1915 earthquake, and was author of several books on the Fucino people and environment.

This cultural center is located in the former convent of the Friars Minor Conventual that was build at the time of St. Francesco di Assisi. A church is joined to the convent, initially dedicated to Santa Maria Annunziata, then St. Francesco di Assisi and finally to San Antonio de Padua. The convent was canceled after the unification of Italy (1861) and became a theater.

After the 1915 Fucino earthquake, local farmers were used to meet here to organize the opposition against the Torlonia family with the aim to get the properties of farmed lands, claiming the right to fish into the former Fucino Lake. Unfortunately, after the Second World War the theater was abandoned and partially ruined.

After the death of Silone, the Centro Studi Ignazio Silone was founded. Beside the theater, a museum, a library and an archive have been located. Different materials concerning the Silone's life and works are permanently exhibited in the museum.

## SPECIAL POSTMARK

On 20<sup>th</sup> April, a Special Postmark of Poste Italiane will be dedicated to the celebration of the centenary of the Fucino 1915 earthquake and to the INQUA workshop. Participants to Fucino 2015 will have the opportunity to buy a commemorative card with this special postmark.

## WI-FI ROUTER

A router for wi-fi connection is available at Centro Studi Ignazio Silone. The procedure for wi-fi connection, is available at the Information Desk.

## RECEIPT OF PAYMENTS AND CERTIFICATE OF ATTENDANCE

Please ask the receipt of your payments to the Information Desk. To obtain your certificate of attendance to the Fucino 2015 please send your request to [paola.giambanco@isprambiente.it](mailto:paola.giambanco@isprambiente.it) after the workshop has ended.

## CLIMATIC CONDITIONS

Pescara is located in Central Apennines, at about 700 m a.s.l. In April, average temperatures typically range between 5 °C and 20 °C. Rainfalls are quite frequent especially in the afternoon.

The post-congress field trip will stop in Ovindoli, at about 1400 m a.s.l. Here, average temperatures are expected to range between 0 °C and 15 °C.

## INSTRUCTION FOR POSTERS

Scientific posters will be displayed in “Palazzo Palladini” in front of the Silone Theater.

Each poster has an assigned space and can be shown for the entire period of scientific sessions.

Thus, participants are kindly recommended to attach their own poster even in the evening of Sunday 19<sup>th</sup> and to remove it in the afternoon of Wednesday 22<sup>nd</sup>. Specific material for sticking the poster directly to the wall will be available on site.
